Hazard Statements: May be corrosive to metals. Causes severe skin burns and eye damage.

Precautionary Statements: Wash skin thoroughly after handling. Wear protective gloves, clothing, eye and face protection. If swallowed, rinse mouth. Do NOT induce vomiting. If on hair or skin, remove all contaminated clothing and rinse skin with water. If inhaled, remove victim to fresh air and keep at rest in a position comfortable for breathing. If in eyes, rinse carefully with water for several minutes. Remove contact lenses, if able and continue rinsing. Immediately call a poison center or doctor/physician. See First Aid instruction for specific treatment. Wash contaminated clothing before reuse. Absorb spillage to prevent material damage. Store in corrosive resistant containers in a secured location. POTENTIAL HEALTH EFFECTS

EYES: Corrosive! Will cause severe burns and permanent eye damage.

SKIN: Corrosive! Will cause severe burns if not rinsed off immediately.

INGESTION: Corrosive! Burns to the mouth, throat and digestive tract. May cause pain in the stomach, difficulty in breathing, nausea, vomiting, diarrhea, and convulsions; in severe cases, collapse and death

INHALATION: Phosphoric acid has a very low vapour pressure at room temperature and is not expected to present an inhalation hazard. However, acid mist can cause irritation of the nose, throat and respiratory tract.

EYES: Immediately flush eyes with running water for a minimum of 30 minutes, preferably up to 60 minutes. Hold eyelids open during flushing. **OBTAIN MEDICAL ATTENTION IMMEDIATELY.** Do not transport victim until the recommended flushing period is completed unless flushing can be continued during transport.

SKIN: Flush skin with running water for a minimum of 20 minutes. Start flushing while removing contaminated clothing. If irritation persists, repeat flushing. Obtain medical attention **IMMEDIATELY.** Do not transport victim unless the recommended flushing period is completed or flushing can be continued during transport.

INGESTION: Never give anything by mouth if victim is rapidly losing consciousness, or is unconscious or convulsing. Have victim rinse mouth thoroughly with water. **DO NOT INDUCE VOMITING.** Have victim drink 1/2 to 1 glass of water to dilute material. If spontaneous vomiting occurs, have victim lean forward with head down to avoid breathing in vomitus, rinse mouth and administer more water. **IMMEDIATELY** transport victim to an emergency facility.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If not breathing and no pulse give cardiopulmonary resuscitation (CPR). Keep patient warm and at rest. Obtain medical attention immediately.

NOTES TO PHYSICIANS OR FIRST AID PROVIDERS: Provide general supportive measures (comfort, warmth, rest). Consult a physician and/or nearest Poison Control Centre for all exposures except minor instances of inhalation or skin contact.

SECTION 6: ACCIDENTAL RELEASE MEASURES

ACCIDENTAL RELEASE MEASURES: Wear respiratory protection and avoid breathing vapors, mists or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. See Section 8 for personal protection equipment.

Stop the discharge if possible and contain by constructing barrier (dykes, lagoons) for release to land, reclaim product for reuse or treat with neutralizing agent and recover for disposal. For release to water, contain by damming and water diversion if possible, neutralize and recover for disposal. Report significant spills to government environmental authorities.

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE: Avoid contact with either liquid or mist. Do not eat drink or smoke in work area. Wash hands thoroughly after handling this material. Store in dry, well-ventilated area away from incompatible materials. Protect against physical damage.

Maintain storage in corrosive resistant containers in secured location.

OTHER PRECAUTIONS: Containers should be kept well sealed when not in use. Handle as a corrosive liquid. See Section 2 for precautions.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Good ventilation should be sufficient to control airborne levels of material. Use process enclosures where possible.

VENTILATION: Good ventilation should be sufficient to control airborne levels of material. Use process enclosures where possible.

RESPIRATORY PROTECTION: Always wear NIOSH/MSHA approved respirator equipment when vapour or mists may exceed applicable concentration limits.

EYE PROTECTION: Chemical safety goggles. A face shield may also be necessary.

SKIN PROTECTION: Nitrile rubber, neoprene, or PVC gloves, rubber boots and protective clothing should be used.

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Have a safety shower/eye-wash station readily available in the immediate work area.
